PROJECT EXPERIENCE

Simon-says game frontend project

- Developed an interactive memory-based game inspired by the classic "Simon Says" game using React.js.
- Designed a dynamic and colorful UI with animations and sound effects using CSS3 and JavaScript for an engaging user experience.
- Implemented game logic to randomly generate sequences and validate user inputs in real time.

Wheather-App frontend project

- Developed a responsive weather application using React.js, providing real-time weather updates for multiple locations.
- Integrated OpenWeatherMap API to fetch live weather data, including temperature, humidity, wind speed, and forecast details.
- Implemented location-based weather search using geolocation APIs for enhanced user convenience.

Tic-Tac-Toe frontend project

- Developed a functional Tic Tac Toe game using HTML, CSS, and JavaScript, implementing core game logic for turn-based play, win detection, and draw conditions.
- Designed a responsive game board with an intuitive layout and hover effects using CSS3, ensuring compatibility across devices.
- Added a restart button feature, allowing players to reset the game board without reloading the page.

SKILLS

- html, css ,javascript
- Reactjs, Redux
- Databases-Mongodb,MySql
- Nodejs
- Express
- git &github

CERTIFICATES

MERN Stack Development Certificate – [Apna College]
Learned and implemented full-stack development using MongoDB, Express.js, React.js, and Node.js.
